Library Classes
The students will be learning how the books are organized in the library so they can locate information and stories they want to read.

We will be reading books about Fall this month.

Information Literacy Skill
How are the books organized in the Library Media Center?

Fiction books are on the shelves in alphabetical order by author’s last name.

For example:
Marc Brown book would be on the “B” shelf.

Non - Fiction books are on the shelves by the book’s subject category.

For example:
All the information books about dogs are on the same shelf.

Free Online Reference Subscriptions
Montgomery County Public Schools purchased subscriptions for a number of online reference services for elementary students and families to access from home. A chart showing the name of the service, URL and the user ID and password you would need to enter in order to use the site is being sent home in the Friday folders on October 28th.

The back of the sheet gives you directions on how to connect to the services from the MCPS home page.

The Montgomery County Public Libraries also have some very useful information on the bottom of the page.

We hope this information will help your family with projects and studies at home.

Take a Look at These Books!
