

**Parents of Teens:  
Are you concerned about your child's eating?  
Is he or she above average weight?**

Consider participating in a voluntary research study testing how effective a group program is in the prevention of excess weight gain among military dependents aged 12 to 17 years who are above average weight and report loss of control eating and/or elevated anxiety symptoms.

Study visits take place at Walter Reed National Military Medical Center, in Bethesda, MD, Fort Belvoir Community Hospital, in Fort Belvoir, VA, Kimbrough Ambulatory Care Clinic in Fort Meade, MD, and Malcolm Grow Medical Clinic in Joint Base Andrews, MD.

Individuals who qualify to participate in this study will be compensated for their time.

For more information, please call 301-295-1598 or 301-295-0864. Our study team looks forward to hearing from you!

**Parents of Teens**  
Are you concerned about your child's eating?  
Is he or she above average weight?

Consider participating in a research study with the  
Uniformed Services University of the Health Sciences,  
Walter Reed National Military Medical Center and  
Fort Belvoir Community Hospital.

<b>What:</b>	<b>Who:</b>	<b>Where:</b>
To test how effective a group program is in the prevention of excess weight gain.	Military dependents aged 12 to 17 years who are above average weight and report loss of control eating.	Walter Reed National Military Medical Center, Fort Belvoir Community Hospital, Kimbrough Ambulatory Care Center, and Malcolm Grow Medical Center.

Individuals who qualify to participate in this study will be compensated for their time.
